

ABSTRACT

The present invention concerns a product taken from the group consisting of a foam, an emulsion, a foamed emulsion, a dispersed emulsion and a foamed dispersion, wherein the interface water-air, water-oil or water-solid comprises a complex formed instantaneously by the mixture of at least a protein (or peptide) and at least a polysaccharide oppositely charged or the mixture of two proteins oppositely charged, said product being in a pH range within which the electrostatic interaction between both compounds oppositely charged occurs and wherein the total amount of protein and polysaccharide is comprised between 0.01 and 5 % in weight.
